

```

public class Firstclass {
    public static void main(String args[]) {
        int n = 5;
        float f = 5.4F;
        char c = 'A';
        boolean b = true;
        String s = "ABCD";
        System.out.println("The value of n is " + n); //printing the value of
n
        System.out.println("Hello world!"); //printing hello world

        if (n >= 10) {
            System.out.println(n + " is greater than 10");
        } else {
            System.out.println(n + " is smaller than 10");
        }
        for(int i=0;i<=10;i++)
        {
            System.out.print(i+","); //OUTPUT 1,2,3,4,5
            if(i==5)
            {
                break;
            }
        }
        int i=0;
        while(i<=5) {
            System.out.print(i + ","); //OUTPUT 1,2,3,4,5
            i++;
        }
    }
}

```
